Springfield, Illinois - City Water, Light and Power’s Energy Services Office is bringing back its High-Efficiency Air Conditioner Rebate program to help customers save money while reducing summer energy usage. CWLP residential customers installing qualifying high efficiency central air conditioning units on or after March 1 could be eligible for the rebate.

Qualifying units must be new with a minimum SEER rating of 16 and a minimum EER rating of 12.5. Cooling capacity must also be less than 72,000 Btuh or 6 tons. Rebates will be given on a first-come, first-served basis to customers meeting all of the eligibility requirements until funding is exhausted. Rebate amounts awarded, which will be applied as a credit to the customer’s CWLP bill, may range from $150 to $600 depending on the unit type installed.

Applicants for the program must:

- Be CWLP metered electric customers.
- The central air conditioner meeting the required efficiency ratings must be installed by an HVAC contractor licensed to operate in Springfield.
- Applications, accompanied by proof of purchase with purchase cost, must be received by CWLP within one year of the installation date to be eligible for the rebate.

For full rebate rules and eligibility requirements see the High Efficiency Air Conditioning Rebate information and form from the CWLP rebate page, [https://www.cwlp.com/ServicesHome/ServicesInformation/AllRebates.aspx](https://www.cwlp.com/ServicesHome/ServicesInformation/AllRebates.aspx)

For more information or questions regarding the High-Efficiency Air Conditioner Rebate and other efficiency and rebate programs, contact the Energy Services Office at 217-789-2070 or email nrgxperts@cwlp.com.
