Mayor**

Springfield, Illinois – Ward 10 Alderman Ralph Hanauer announced today that his wife Lisa tested positive for COVID-19. She interacted with someone who tested positive and immediately went for testing and received her results yesterday.

“I would like to stress to everyone that this virus is real and impacting families and neighbors across our community. We are at home in quarantine and will do so over the next two weeks,” Hanauer stated. “Lisa’s symptoms were equivalent to allergy and sinus problems that are common for both of us this time of year. However, her symptoms were linked to COVID-19. I am stressing to people to wear your masks in public, keep socially distant, and wash your hands as much as possible.”

The Hanauer family is following the public health safety guidelines and have reached out to all individuals they have come in contact.
