

Bike Rack Policy

 buses are equipped with bike racks extending travel options to “Wherever life takes you.” No special permit or advance reservation is required. One bike is included in a single fare. Bicycle racks can only carry two bikes at one time and are available on a first-come, first-served basis. For safety reasons, bus operators are not allowed to assist with loading or removing bikes from racks. Passengers are solely responsible for loading and unloading their bicycles. For faster boarding, passengers are expected to remove any loose objects or personal items such as backpacks or satchels that could fall off the bike during transit. This includes pumps, water bottles, book bags and locks that may be stored on a bike while waiting for the bus.

 bike racks are designed to carry standard bikes only. Recumbent bikes, tandem bikes, or motor-powered bicycles of any kind, as well as three wheeled bikes are not permitted, because they do not fit safely into the rack.

Passengers must load their bikes directly in front of the bus or from the curb. They must not expose themselves or their bicycles to passing traffic. It is recommended that bikes be hoisted by the seat tube and stem as this provides good leverage and stability.

Anyone 14 years of age or older may bring a bicycle on board a rack-equipped bus. Passengers 12 and 13 years of age must be accompanied by an adult. Children under 12 years of age are not permitted to bring bicycles on SMTD buses. Passengers are to be ready to load by taking all loose objects and personal items off their bike prior to the bus arriving. Passengers should wait for the next bus if rack is full.

When passengers arrive at their destination, they should be sure to exit the front door and tell the driver that they are going to remove their bike from the rack.

Passengers are to raise the rack to its upright position when no other bike is present.

Cyclist assume all responsibility for injuries and/or damages incurred as a result of bike rack utilization. This includes bikes, personal property, or persons while using the bike racks or riding the bus.

Unclaimed bikes inadvertently left on SMTD vehicles may be retrieved by calling Customer Service as (217) 522-5531. Be prepared to describe the bike and prove ownership.

 is not responsible for any bikes left behind.

TRANSPORTATION FOR WHEREVER LIFE TAKES YOU

LOADING YOUR BIKE

1. Before the Bus Arrives

Please remove pumps, water bottles, book bags and locks that may be stored on your bike while you wait for the bus.

2. Loading Your Bike

Leave your bike at the curb while you prepare to release and lower the rack.

3. Releasing the Bike Rack

If the bus arrives with the bike rack folded against the bus, release it by pulling the center handle up, then lower the rack.

4. Positioning Your Bike

If only one bike is being loaded, put it in the position closest to the bus. Face your bicycle so that the front tire is facing the locking arm (The rack is labeled for your convenience). Lift your bicycle onto the rack.

5. Securing Your Bike

With your bike's wheels in the wheel wells, pull the spring-loaded locking arm out and over your front bike tire as close to the frame as possible. Make sure it is placed on your tire and not on the fender or frame.

REMOVING YOUR BIKE

Leave by the front door and tell the operator that you'll be removing your bike.

1. To release your bike, simply pull the support arm away from the wheel.
2. Lift your bike from the rack.
3. If the rack is empty please fold the rack against the bus by pulling the handle toward you.
4. Raise the track until it locks into place.

Move toward the curb quickly and let the operator know it's safe to leave.
