

2018 Ward Planning Meeting			
WARD 1			
ISSUES/CONCERNS		POSITIVE COMMENTS	
ISSUES/CONCERNS		KEEP/CHANGE	
Live south of road ranger on Toronto Road. Road to frontage road has never been resurfaced. Ameren put in new gas lines and sewer lines put in. The road is torn up. It is crumbling. Who is responsible? And Corner of Ridge View and Old Chester Road.	High standard of living at reasonable costs	Lifestyle (ease of life) – keep	
Hill Top Road – what is the update?	Lincoln and Lincoln Sites	See more diversity in police and fire department	
All the roads around the lake. They are rocket ship roads. Long range plan to make asphalt and make them wider and helping with walkers. Make them more tenable. Long-term plan.	Colleges and universities	Change one way streets (fewer)	
Weindel Road – reflectors put up and make the narrow path for crossing. By Camp Widjiwagan	Lake Springfield – nice place to live near the lake	More parking downtown	
Dredge plan for the lake?	Response from city officials to questions, comments, problems	Free parking downtown	
Lake is the biggest thing in the city. We need a plan to dredge. Maintenance. Speeding. Sidewalks too because we have triathlon and marathons races that close the roads.	Good water	Keep the cheap parking downtown	
Where are with with dredging? What is the dredging plan? Have heard nothing back after the engineers were hired.	Lot of Cultural events – concerts, comedy club	Keep Abe Lincoln	

Hill Top to East Lake. Should use Buckeye to allow traffic. Burr Oak is a thorough fair. Running stop sign and speeding. All hours of the day.	Youth sports	Change on working harder on inclusion and real diversity. It is not equally diverse. As a citizen (lived here 8 years) You don't see real inclusion where you see people live, how they are employed, not all her students feel a sense of welcoming. We need to work on together.
Burr Oak and White Beach – one 30 mile speed limit sign. No others? Can we lower it to 25 mile and put more markers through the subdivision.	Excellent health care	Change collaboaration with all departments (between CWLP, PW, Police, Fire) no one knows what is going on. Need to work together.
Three-way stop sign at Laconwood and Red Oak.	Reasonable golf course	Planning & Zoning makes recommendations but CWLP makes recommendations as well. How can they work together better? It is cumbersome but work together.
Right lane ends by CWLP. Put an arrow to use it as a turn lane into plant and then make it one lane going straight on bridge	Good facilities for older people and retirement	Keep the Neighborhood Police Officer program
Instead of stop sign – make it a flashing light.	Great access to train, highway, plane	Keep public transportation
Close Burr Oak all together		
Bad criminal activity – breaking cars.		
Bike Lanes on East and West Lake Shore Drive. Where are we with that? Is there a status report?		
City's website needs to be looked at by someone. – Update on city projects and events and who to contact?		
Way out to Lincoln Land – blew thru the stop sign thru Shepard Road and speeding all around the lake.		
Driving back and forth to Lincoln Land – deer situation is bad. What can we do about it.		
City providing internet? Can we expand the downtown free wifi or a competitor for Comcast		
Capital City is becoming a hole and needs help.		

Stevenson Corridor more development and attention		
Conversion of natural gas and ash ponds – Status Report		
Status Report on Beach House		
City Librarian is doing a great job on programs. But form a committee/task force on homeless population and elsewhere		
Septic to Sewer conversion – what is the status?		
Any new projects impacting certain wards – people should know. In case people have questions or need aware. Timber Lane Creek		
Is there an update on the Old Marina property? Any talk or conversion of the property being discussed?		
How prepared are we for an active shooter situation. With police and fire – update on our status and can we handle it at a community.		
Is the Neighborhood Watch program still active and how can we do it?		
Flying Dumping – can we do something about it or fine?
